

# SCJS 2010/11 QUESTIONNAIRE

## USER NOTES

This document provides the full SCJS questionnaire, including all questions asked of respondents, as well as notes and instructions to guide the reader.

Chapter 3 of the 2010/11 Scottish Crime and Justice Survey Technical Report (available from the Scottish Government survey website and Economic and Social Data Service (ESDS) Archive) provides a summary of the questionnaire content and information on the development of the questionnaire. The Technical Report also provides comprehensive details on the design and administration of the survey.

The SCJS questionnaire has a complex structure, but basically consists of three elements:

- The **main questionnaire** (sections 1, 2, 4, 5 and 6) consists of a set of core modules asked of the whole sample, including demographics (section 6); and a set of **full and quarter-sample modules** (section 5), containing questions on a variety of topics;
- A **victim form** (section 3) which collects details about the incidents a respondent may have experienced during the reference period (the 12 months prior to the month of interview). This victim form can be repeated up to five times; the number of victim forms completed depends on the number and nature of incidents respondents experienced;
- A **self-completion questionnaire** covering sensitive issues (sections 7, 8 and 9). All respondents were asked to complete a self-completion questionnaire but had the option to refuse this due to the sensitive nature of the questions.

Each of these elements and the sections they contain are presented in the table of contents after this introduction.

### The following conventions are used in this document:

- The question label (and generally SPSS variable name) is shown to the left in **BOLD CAPITALS**;
- Question text for interviewers to read out to the respondent is shown in **bold text**;
- The routing / filtering instructions for the question are displayed above the question text in CAPITALS: a text description of the routing is provided followed by a question and code specification in brackets;
- Instructions to interviewers are written in CAPITALS;
- Instructions to CAPI scripters are written in **RED BOLD CAPITALS** and do not display on screen;
- Text substitutions in question (and sometimes code) text are denoted by the symbols < > with alternate substitutions separated by a /. (The specifications for text-substitutions are not shown in this document for simplicity.)

**Commonly used notation includes:**

- SHOW SCREEN or SHOW CARD are used to indicate that the interviewer should show the computer screen or a card to the respondent to allow them to select their response options;
- SINGLE CODE ONLY means that only one response option can be coded. MULTICODE OK allows more than one response option to be coded;
- RANDOMISE means that the response options are randomised each time they appear on screen;
- **<INSERT DATE>** refers to the start of the 'reference period' – the first day of the month 12 months prior to the month of interview (see section 5.1 of the Technical Report for further detail).
- Other (SPECIFY) within the code frame denotes that the respondents answer is recorded by the interviewer.
- Notes to questionnaire users are shown in shaded grey boxes.
