

2nd International Conference
**on Governance, Crime
and Justice Statistics 2014**

Timothy Kennel

Has been a mathematical statistician at the United States Census Bureau for 12 years. He serves as the Lead Scientist for the United States National Crime Victimization Survey and is responsible for the sampling, weighting, and variance estimation methods of the survey. He is currently working on new methods to produce small area victimization rates in the United States.

Dr. Kennel received a PhD in survey methodology from the Joint Program in Survey Methodology at the University of Maryland. His primary interest is in statistical methods related to adaptive design, frame coverage, estimation, and variance estimation.
